Professional Summary

Full-stack Software Engineer with 7+ years of experience designing and scaling modern web applications across analytics, SaaS, and AI-driven platforms. Led development of real-time dashboards and enterprise tools using **Angular, Node.js, and GraphQL**, and built performant, component-based architectures with **Vue 3 and TypeScript**. Key contributor to **Sysarb**, a SaaS platform on pay transparency, improving UI performance and developer efficiency through modular design and internal audits. Experienced in **system architecture, cross-team collaboration, and mentoring**, with a focus on delivering clean, maintainable, and high-impact solutions.

Professional Experience

Full-stack Software Engineer (Full-time), Miller Development AB - Developed and maintained core modules using Angular and Node for a real-time analytics dashboard. - Integrated GraphQL APIs and developed backend features with Node.js and Express. - Contributed in product discussions, architecture reviews, and agile sprints. - Mentored junior developers and supported code reviews for quality assurance. - Developed and maintained a SaaS platform focused on pay transparency and equity (Project: Sysarb). - Implemented new UI features using Vue 3 and TypeScript with a scalable component architecture. - Collaborated with remote product teams and stakeholders to align UI/UX with user needs. - Drove performance optimizations and design consistency through internal audits. - Designed and implemented AI-driven solutions.	05/2019 – Present Hybrid, Dumaguete, Central Visayas, Philippines
Frontend Developer (Contractual), BetterTradeOff Ltd. - Built reusable and framework-agnostic Web Components to improve code reusability across apps. - Led partial migration of legacy AngularJS to modular TypeScript components. - Contributed to a scalable internal design system tailored for dynamic financial dashboards. - Worked closely with designers and QA for seamless cross-team delivery.	04/2023 – 01/2024 Remote, Singapore

Education

Bachelor of Science in Information Technology, Silliman University Thesis: Developed a digital restaurant ordering system to improve order accuracy and speed for local food businesses.	06/2014 – 2018 Dumaguete City, Philippines

Core Skills

Frontend Development

Vue.js, Angular, React, Nuxt, TypeScript, Web Components

Backend Development — Proficient

Node.js, Express, Hono, GraphQL, REST APIs, CMS

Serverless & Cloud

Netlify Edge Functions, Vercel, Cloudflare Workers, Supabase, Cloudflare D1

UI/UX

Design Systems, Responsive Design, Accessibility, Figma

General

JavaScript, HTML/CSS/SCSS, Git, CI/CD, Agile/Scrum

Languages

English

Fluent

Filipino / Cebuano

Native

Hobbies

Brewing Coffee

Espresso and Pour-over

Running

Sometimes jogging, sometimes walking

Road-trips/Traveling

Sea/coastal or the mountains
